Research Interest

My interests lie in various domains of computer systems including **distributed systems**, **parallel file systems**, and **high performance computing**. Recently, my interest has also piqued in the direction of **big data analysis** to optimize system performance. I am also trying to optimize **systems for ML** as well as use **ML models to optimize systems**. I have also taken an active interest in data optimization for **resource-constrained devices**, such as IoTs and edge/fog computing.
